

Safe Use of Digital Technology and Online Environments

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY

Policy Statement

Our Service is committed to fostering a culture that creates and maintains a safe online environment with support and collaboration from staff, families and community. As a child safe organisation, our Service embeds the [National Principles for Child Safe Organisations](#) and continuously addresses risks to ensure children are safe in physical and online environments. Digital technologies have become an integral part of many children's daily lives. For this reason, it is important that our educators are not only familiar with the use of digital technologies, but are able to guide children's understanding of, and ability to interact, engage, access and use a range of digital technology in a child safe environment.

Children's safety and wellbeing is paramount and our Service has the responsibility to provide and maintain a safe and secure working and learning environment for staff, children, visitors and contractors, including online environments. We aim to create and maintain a positive digital safe culture that works in conjunction with our Service philosophy, and privacy and legislative requirements to ensure the safety of enrolled children, educators and families. We believe that children's safety, rights, and best interests are the paramount consideration for all Service operations, decisions and functions.

The use of Close Circuit Television (CCTV) installed at the Service aims to address crime prevention strategies to reduce concerns, deal with complaints and support investigations. Our Service adheres to the Privacy Act 1988 (Privacy Act) and comply with the Australian Privacy Principles.

Goals

This policy applies to children, families, staff, educators, management, approved provider, nominated supervisor, students, volunteers and visitors of the Service.

- All stakeholders have a responsibility to ensure online safety, as their children grow up in digital contexts. Children will be provided information about online safety.
- Services are encouraged to use the National Model Code and Guidelines developed by ACECQA, to increase awareness on the effective and safe use of digital and personal devices in daily practice.
- Services are advised to commence using the National Model Code and the Guidelines to increase awareness of staff, students, volunteers and families regarding child safety risks and considerations when using personal and service devices in the centre.
- Services can adhere to the four parts of the National Model Code as follows:
 - **Part 1:** Only service-issued electronic devices should be used when taking images or videos of children while providing education and care. The appropriate use of service-issued

electronic devices for taking, sending and storing images or videos of children should be clearly outlined in policies and procedures.

- **Part 2:** Personal electronic devices that can take images or videos (such as tablets, phones, digital cameras, smart watches) and personal storage and file transfer media (such as SD cards, USB drives, hard drives and cloud storage) should not be in the possession of any person while providing education and care and working directly with children. Any exceptions to this should be for limited, essential purposes that are authorised in writing (or through another means if written authorisation is not reasonably practicable) by the approved provider at the service, and where that access does not impede the active supervision of children.
- **Part 3:** Essential purposes for which use and / or possession of a personal electronic device may be authorised for purposes other than taking images or recording videos of children.
- **Part 4:** Approved providers and their services should have strict controls in place for the appropriate storage and retention of images and videos of children.

(Source: Guidelines for the National Model Code - ACECQA and Australian Government eSafety Commissioner. (n.d.). Online safety for under 5s).

- Services are recommended to be following the four fundamental principles and recommended practices
 1. Young children's relationships with adults and peers matter in digital contexts
 2. Young children's health and wellbeing is actively supported in digital contexts
 3. Young children's citizenship is upheld and fostered in digital contexts
 4. Play and pedagogy promotes young children's exploration, social interaction, collaboration and learning in digital contexts.

(Source: Early Childhood Australia: Statement on young children and digital technologies).

Our Service uses digital technology and electronic devices as a tool for learning with children, documenting their learning and development, communicating with families and the wider community, supporting program planning and administration tasks and enhancing safety and security through systems such as sign in/out platforms and CCTV monitoring. Our educators are diligent in ensuring children are only able to access age-appropriate technology on a Service issued device.

The Approved Provider / Nominated Supervisor / Management will ensure:

Governance and Compliance

- ensure that obligations under the Education and Care Services National Law (including Part 6A) Education and Care Services National Regulations and regulator directions (where relevant) are met
- ensure educators, staff, students, visitors and volunteers have knowledge of and adhere to this policy and associated procedure
- take every reasonable precaution to prevent breaches of this policy and related legislation
- ensure families are aware of this policy and advised how and where it can be accessed
- ensure processes are in place to ensure families who speak languages other than English understand the requirements of this policy, including providing authorisation for images and videos
- ensure mandatory national child safety training is completed by the approved provider, management, staff, educators, students and volunteers
- ensure child safe practices are embedded into organisational practice as per National Principles for Child Safe Organisations
- remain informed of updates to privacy legislation and guidance from the Office of the Australian Information Commissioner (OAIC)
- ensure children, educators and families are aware of the Service's complaints handling process to raise any concerns they may have about the use of digital technologies or any other matter (see: *Dealing with Complaints Policy*)
- ensure staff, educators, families and children are informed of updates to policies, procedures or legislation relating to digital technologies.

Induction, Training and Professional Learning

- ensure new employees, students and volunteers are provided with a copy of the *Safe Use of Digital Technologies and Online Environments Policy* and procedure as part of their induction and are advised on how and where the policy can be accessed
- provide professional learning to educators and staff regarding the safe use of digital technologies and online environments.

Child Safety Culture

- ensure all staff, educators, students and volunteers are aware of their mandatory reporting obligations and promptly report any concerns related to child safety, including inappropriate use of digital technology or inappropriate conduct to the approved provider or nominated supervisor [See *Child Protection Policy*]
- promote and support a child safe environment, ensuring adherence to the *Child Safe Environment and Child Protection Policies*, including mandatory reporting obligations
- maintain appropriate educator to child ratios and active supervision at all times, including when using technology
- ensure all students, visitors and volunteers are supervised at all times and never left alone with a child
- conduct risk assessments regarding the use of digital technologies by staff and children
- review risk assessments annually or as soon as practicable after becoming aware of circumstances that affect child safety
- ensure a review of practices is conducted following an incident involving digital technologies and online environments, including an assessment of areas for improvement
- ensure reasonable precautions are taken to prevent personal device use in breach of National Law and regulator directions (if applicable in your state/territory)
- install and maintain anti-virus and internet security systems including firewalls to block access to unsuitable websites, newsgroups and chat rooms
- support educators to:
 - o encourage children to seek support if they encounter anything unexpected that makes them feel uncomfortable, scared or upset
 - o listen sensitively and respond appropriately to any disclosures children may make relating to unsafe online interactions or exposure to inappropriate content, adhering to the *Child Protection Policy*, *Behaviour Guidance: Bullying Policy* and reporting procedures
 - o respond to and report any breaches and incidents of inappropriate use of digital devices and online services to management
- ensure all concerns are documented and responded to promptly and appropriately, with support provided to the child and their family as required
- ensure all educators, staff, students and families are advised of the *Protected Disclosure (Whistleblower) Policy*, whistleblower protections and processes

- report any suspected cases of online abuse to the relevant authorities, including the e-Safety Commissioner and Police, in accordance with legal requirements and child protection procedures
- notify the regulatory authority within 24 hours, via [NQA ITS](#), if a child is involved in a serious incident, including any unsafe online interactions, exposure to inappropriate content or suspected online abuse.

Physical Environment and Supervision

- reflect on the Service's physical environment, layout and design to ensure it supports child safe practices when children are engaged in using technology
 - perform regular audits to identify risks to children's safety and changes in room set-ups that can indicate areas of higher-risk and become supervision 'blind spots'
 - ensure location of digital technology/equipment allows educators to remain in line-of-sight of other staff members when working with children
 - only permit children to use devices in open areas where educators can monitor children's use
 - be aware of high-risk behaviours for children online, including uploading private information or images, engaging with inappropriate content (inadvertently or purposefully), making in-app purchases, and interacting with unsafe individuals
 - ensure all devices are password protected with access for staff only
- where Service-supplied digital devices are used during transportation and excursions, they must be used in accordance with practices outlined within this policy and associated procedure
- remind families that children enrolled at the Service are not permitted to bring electronic devices to the Service, unless an exception has been discussed with the approved provider or nominated supervisor where the device may be required to support a diagnosed medical condition or disability

Personal Device Restrictions

- ensure all staff, educators, volunteers and students adhere to National Law legislation (and regulator directions if applicable) regarding the supply, authorisation and use of electronic devices
- inform all staff, educators, visitors and volunteers that use of personal electronic devices to capture, store or transfer images or videos of children being educated and cared for by the Service is strictly prohibited
- ensure personal electronic devices are not in the possession of any relevant person involved in the operation of the Service while working directly with children

- relevant persons include approved providers, service leaders, educators, employees, volunteers, or visitors (e.g. ECIP professionals) while working directly with children
- restrictions do not apply to people who do not work directly with children and who are not providing education and care
- any 3rd party professional (NDIS funded support professionals, Inclusion Support Professionals) can only use a device that is issued by their business or institution and this must be a work-only device and not used for personal use
- legislative restrictions do not apply to families who are dropping off or collecting their child from the Service
- inform staff that they may be in the possession of their personal device during a break, provided no enrolled children are present or have access to the staff room

Exemptions for Use of Personal Devices

- the approved provider may grant written exemptions permitting a person to use or be in possession of an electronic device while working directly with children for prescribed circumstances
- a person with an exemption must not use the personal device to take images or video of children while working directly with children
- exemptions may apply when required for operational activities, for example during excursions or when providing transportation where the device is necessary for the purposes of safety or the provision of education and care to the children. Risk assessments should consider if a service-issued device will be sufficient to meet the safety requirements of all children without a reliance on personal devices.

Exemptions may include:

- o emergency communication during incidents such as a lost child, injury, lockdown, or evacuation
- o personal health needs requiring device use (e.g. heart or blood sugar monitoring)
- o disability related communication needs
- o urgent family matters (e.g. critically ill or dying family member)
- o local emergency event to receive alerts (e.g. government bushfire or evacuation notifications)
- exemptions for prescribed circumstances must be reviewed every 3 months
- written authorisations must be retained for a period of 3 years
- an additional prescribed circumstances may apply if a Service-supplied or issued device stops working and another device is temporarily required

- approved providers may revoke authorisations as required, ensuring that all revocations are properly documented
- written prescribed circumstance authorisations must include approved provider details, person's details (including name and role), name of person making the authorisation, description of personal device, reasons for the authorisation and duration of the authorisation.

Service-supplied Devices

- ensure staff and educators only use Service-supplied or issued devices for taking images or videos of children
- ensure all devices purchased for the Service are recorded via the *Electronic Service-Supplied Device Form*
- ensure the *Electronic Service-Supplied Device Form* includes the date of supply, type of device, make, model, serial number, name and signature of approved provider supplying the device and a declaration that the device is configured to operate in line within this policy
- create and maintain a register for all service-supplied electronic devices used at the Service including records of allocation, use and return [*Electronic Service-Supplied Device Form; Electronic Device Register*]
- the *Electronic Device Register* should include type of device, unique identifier (e.g. asset number), who device is allocated to, dates of allocation and return (revocation records)
- records relating to the supply or issue of electronic devices, should be stored securely for a period of 3 years from the date the record was made
- electronic devices supplied or issued by and registered with the Service will be stored in the assigned room and switched off
- document a record of revocation for any electronic devices no longer used in the Service
- ensure Service-supplied devices are configured, monitored and maintained to prevent unauthorised access or misuse
- ensure a service-supplied device is not shared across multiple services.

Images, Videos and Authorisation

- determine who is authorised to capture, use, store and destroy images and videos of children using Service-supplied devices
- inform parents/guardians during enrolment and orientation how the Service will capture, use, store and destroy images and videos

- request written authorisation from families to capture, use, store and destroy digital documentation including images and video of children at time of enrolment
- ensure images or videos of children are not taken, used or stored without prior parent/guardian authorisation
- develop, maintain and share a confidential record of all children who are NOT to be photographed or videoed
- obtain written authorisation from parents/guardians for children to use electronic devices (See: *Cyber Safety Authorisation*)
- obtain written authorisation to collect and share personal information, images or videos online (Service website, Facebook, Instagram)
- seek written authorisation from parents/guardians when an outside photographer/agency is contracted to take photographs for marketing purposes or to take individual and group photos. Only children who have written authorisation from their parent/guardian will be included in any photography. [See *Media Authorisation Form*]
- ensure children without photography authorisation are provided with alternative activities during external photography sessions
- ensure ECIP visitors gain authorisation from both the approved provider and parent/guardian prior to taking images or video of children whilst at the Service
- ensure staff, educators, visitors and volunteers do not transfer images or videos from Service-supplied devices to personal devices. Unauthorised transferring of digital data may result in disciplinary action.

Data and Privacy

- ensure the *Privacy and Confidentiality Policy* is adhered to at all times
- ensure images and videos will be stored securely with password protection, with access limited to authorised persons only
- back-ups of all digital data, whether offline or online (such as a cloud-based service), will be performed
- digital data stored at the Service will be deleted and destroyed in accordance with the *Record Keeping and Retention Policy*
- ensure every child is protected from exploitation of photographic and video images
- ensure images or videos do not show children in distress, in positions that may be perceived as sexualised or in a state of undress

- images and videos used for documenting children's learning and development must be held for 3 years after the child's last day of attendance, then destroyed
- processes must ensure families who speak languages other than English understand the authorisation requirements
- notify the Office of the Australian Information Commissioner (OAIC) in the event of a possible data breach by using the online [Notifiable Data Breach Form](#). This could include:
 - o a device containing personal information about children and/or families is lost or stolen (parent names and phone numbers, dates of birth, allergies, parent phone numbers)
 - o a data base with personal information about children and/or families is hacked
 - o personal information about a child is mistakenly given to the wrong person (portfolios, child developmental report)
 - o any possible breach within the Service or if the device is left behind whilst on an excursion.

Educators will:

- adhere to the *Safe Use of Digital Technologies and Online Environments Policy* and associated procedure
- be aware of current child protection law, National Principles for Child Safe Organisations and their duty of care to ensure that reasonable steps are taken to prevent harm to children
- participate in practical training related to digital safety, privacy protection and responsible use of technology
- understand the critical importance of implementing active supervision strategies when children are accessing online environments to keep children safe
- promote and contribute to a culture of child safety and wellbeing in all aspects of our Service's operations, including when accessing digital technologies and online learning environments
- not use, or have access to, any personal electronic devices while working directly with children, unless an exemption has been authorised
- not access personal social media on any device while working directly with children
- keep passwords confidential and log out of computers and software programs
- ask permission before taking photos of children on any device and explain to children how photos of them will be used and where they may be published
- ensure images and video must not show children in distress, in a position that may be perceived as sexualised or in a state of undress, including where genitalia may be exposed
- ensure children's personal identifiable information is not shared online
- ensure screen time is NOT used as a reward or to manage challenging behaviour

- follow the Service's *Physical Activity Policy* regarding recommended screen time limits and sedentary behaviour of children
- ensure any digital media, television programs or online content accessed at the Service will be age-appropriate, culturally respectful and consistent with the Service's *Educational Program and Physical Activity Policies*
- introduce concepts about online safety to children at age-appropriate levels
- consult with children about matters that impact them, including the use of online environments
- report any concerns related to child safety, including inappropriate use of digital technology to the approved provider or nominated supervisor.

Families will:

- adhere to the *Safe Use of Digital Technologies and Online Environments Policy* and associated procedure
- not use personal electronic devices, such as mobile phones, smart watches or META sunglasses, to take photos, record audio, or capture video of children being educated and cared for at the Service
- provide written authorisation indicating whether or not the Service may take, use, store or destroy images or videos of their child
- provide written notification if they wish to withdraw the authorisation at any time
- be requested to provide written authorisation/consent for individuals visiting the Service to take photographs of their child/ren (e.g., ECIP professionals, professional photography for marketing, school photos etc.)
- be aware that sometimes other children in the Service may feature in the same photos, videos, and/or observations as their children. In these cases, families are never to duplicate or upload them to the internet/social networking sites or share them with anyone other than family members.

Visitors and Volunteers will:

- adhere to the *Safe Use of Digital Technologies and Online Environments Policy* and associated procedure whilst visiting the Service
- not use personal electronic devices, such as mobile phones smart watches or META sunglasses, to take photos, record audio, or capture video of children being educated and cared for at the Service
- report any concerns related to child safety, including inappropriate use of digital technology, to the approved provider or nominated supervisor

- obtain written authorisation from parents/guardians to capture images or video of a child for observation/documentation purposes only. This applies to visitors who are supporting children at the Service (NDIS funded support professionals, Inclusion Support professionals) (See *ECIP Confidentiality Agreement*).

USE OF CLOSED-CIRCUIT TELEVISION (CCTV) MONITORING

Our Service uses Closed-Circuit Television (CCTV) to monitor the physical environment. We will regularly review guidance on the use of surveillance devices, including information provided by the Office of the Australian Information Commissioner.

- Families are informed that the Service uses CCTV during enrolment and orientation
- A sign is placed at the entrance of the Service to advise staff, families and visitors about the CCTV
- Cameras are not installed in private areas such as bathrooms or shower areas and all cameras must be visible
- Access to footage is strictly controlled and protected by secure, password-protected systems
- Only authorised personnel are permitted to access footage, in accordance with privacy laws and Service policies
- Footage is not accessible to external parties with appropriate authorisation.

Access to recordings will only be disclosed to:

- The relevant state Ombudsman to assist with investigations on child protection matters
- A member or office of a law enforcement agency to assist with investigations
- The approved provider or nominated supervisor to investigate situations that may have occurred.

CAMERA USE

Closed-Circuit Television (CCTV) operates at the Service and comprises of:

- 12 fixed position cameras
- Digital Hard Drive Recorder
- 1 Public Information Sign

CAMERA LOCATIONS

- The entrance and exit points
- Foyer Area
- Infants Rooms
- Toddler Room

- Early Learners Room
- Prep rooms
- Outdoor areas

The CCTV recording system operates in real mode, monitoring the site continuously 24 hours a day. Footage and information collected via the recording system will be governed by [Australian Privacy Principles](#) and all relevant staff will be kept up to date with requirements under Australia's privacy law. CCTV footage is kept in a secure location at the Service for a period of up to 30 days. Any recorded footage will be destroyed or de-identified when it is no longer needed for the purpose it was collected.

SOFTWARE PROGRAMS AND APPLICATIONS

Our Service uses a range of secure software programs and apps on service-supplied or issued devices to support the educational program and administration of the Service.

- All applications used by staff, educators, visitors and children must be carefully selected, regularly checked and kept up to date
- Access to software programs and applications must be password protected
- Each user must create their own user account and not share information
- Educational program software used by educators to share observations, photos, videos, daily reports, and learning portfolios with families will be hosted on a secure, closed and authorised platform
- Programs requiring additional background checks (such as CCS Software) must only be accessed by authorised staff who have completed necessary screening processes in accordance with Family Assistance Law.

ARTIFICIAL INTELLIGENCE (AI) USE

Educators or staff using AI must be aware of limitations, privacy risks, and the potential for errors in the information it provides.

- AI may be used to support documentation tool; however, educators and staff must verify accuracy and not rely upon AI as an authoritative source
- Educators and staff must enter original work and verify that information obtained from AI is contextually relevant
- Educators and staff must not enter personal or identifying details of individual children (such as names and dates of birth) into AI tools.

- Data and privacy concerns must be addressed in accordance with this policy and the *Privacy and Confidentiality Policy*.

BREACH OF POLICY

Staff members or educators who fail to adhere to this policy may be in breach of their terms of employment and may face disciplinary action. Visitors or volunteers who fail to comply to this policy may face termination of their engagement. Family members who do not comply with this policy may place their child's enrolment at risk and limit the family members access to the Service.

TERMINOLOGY	
Artificial intelligence (AI)	An engineered system that generates predictive outputs such as content, forecasts, recommendations, or decisions for a given sent of human defined objectives or parameters without explicit programming.
Cyberbullying	When someone uses the internet to be mean to a child or young person so they feel bad or upset
Cyber safety	Safe and responsible use of the internet and equipment/devices, including mobile phones and devices.
Disclosure	Process by which a child conveys or attempts to convey that they are being or have been sexually abuses, or by which an adult conveys or attempts to convey that they were sexually abused as a child

Generative artificial intelligence (AI)	A branch of AI that develops generative models with the capability of learning to generate novel content such as images, text and other media with similar properties as their training data
ICT	Information and Communication Technologies
Illegal content	Includes: images and videos of child sexual abuse Content that advocates terrorist acts Content that promotes, incites or instructs in crim or violence Footage of real violence, cruelty and criminal activity
Optical Surveillance Device	Has the same meaning as in section 6(1) of the Surveillance Devices Act 2004 of the Commonwealth
Online hate	Any hateful posts about a person or group based on their race, religion, ethnicity, sexual orientation, disability or gender
Smart toys	Smart toys generally require an internet connection to operate as the computing task is on a central server
Sexting	Sending a sexual message or text, with or without a photo or video. It can be done using a phone service or any platform that allows people to connect via an online message or chat function
Unwanted contact	Any type of online communication that makes you feel uncomfortable, unsafe or harassed.
